Let's Win! Pancreatic Cancer

Let's Win is an online platform that enables doctors, scientists, and patients to share fast-breaking information on potentially life-saving pancreatic cancer treatments and clinical trials.

All stories published on the Let's Win website are available in English and Spanish and are reviewed by medical experts.

Test Your Knowledge of Symptoms

Pancreatic Cancer: Among the Lives Lost

Pancreatic Cancer: By the Numbers

- About 60,000 people are diagnosed with pancreatic cancer each year in the US
- The average rate of occurrence in the US is 12.9% but in the Black community the rate is 15.7%
- The 5-year survival rate is about 10%
- Most people are diagnosed at a later stage of the disease
- The most effective treatment is surgical removal, but most patients are diagnosed at a too advanced stage
- At this time, there is no easy screening test for pancreatic cancer

Symptoms of Pancreatic Cancer

Unintended Weight Loss

Back Pain

Pain After Eating
