

Pancreatic Cysts

If you have a pancreatic cyst and are concerned about developing pancreatic cancer, here are some questions to help you start a discussion with your doctor.

1. What is the pancreatic cancer rate for people with pancreatic cysts?
2. What type of pancreatic cyst do I have?
3. Is this cyst benign or precancerous, or cancerous?
4. Where is the cyst located in the pancreas, and how large is it?
5. Could the cyst be related to my symptoms?
6. Do I have more than one cyst, and if so, what does that mean?
7. Are there any special tests I should have for my cysts?
8. Should I get regular screening? Is there anything else I can do?
