

### **Pancreatitis**

Pancreatitis, a painful inflammation of the pancreas, can occur suddenly or it may be chronic. Here are some questions to ask your doctor about the relationship between pancreatitis and pancreatic cancer.

1. What is the pancreatic cancer rate for people with chronic pancreatitis?
2. Is there anything I need to watch out for?
3. Should I get screened regularly?
4. Is there anything I can do proactively other than get screened?
